

# Flip to ErgoTube

## NEW Ergonomically designed ErgoTube

From the leader in ergonomic design, Biohit ErgoTubes are designed with a patented flip cap, which significantly reduces strain and effort during use. This feature aids in opening the ErgoTubes more safely than traditional micro centrifuge tubes.

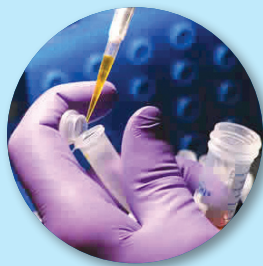

# NEW Ergonomically designed ErgoTube

The ErgoTube meets today's demand for ergonomic, safe, and functional tubes for use in centrifugation, sample prep, boiling, and storage.

Biohit ErgoTubes are RNase, DNase and Pyrogen-free and are available in various colors and volume ranges.

## ErgoTube features include:

- Unique ergonomic flip cap design to reduce strain and effort during use
- Up to 40 % less force when opening
- Contamination-free opening
- Secure for boiling and freezing
- DNase, RNase, Pyrogen free (batch certified) packaged in tamper-proof re-sealable bags
- Excellent for centrifugation, sample prep or storage
- Made of virgin polypropylene
- Available in 3 sizes: 0.5, 1.5, and 2.0ml
- Several colors for easy sample identification
- Frosted area for marking-ID on the cap and side
