

BIO-RAD

ProteoMiner Kits

ProteoMiner protein enrichment technology is a novel sample preparation tool used for the compression of the dynamic range of protein concentrations in complex biological samples. The presence of high-abundance proteins in complex biological samples (for example, albumin and IgG in serum or plasma) makes the detection of medium- and low-abundance proteins extremely challenging. ProteoMiner technology provides a method for overcoming this challenge, allowing the exploration of the entire proteome.

Ordering Information

Catalogue#	Description	Price
163-3000	ProteoMiner Protein Enrichment Kit, 10 preps, includes 10 spin columns, wash buffer, elution reagents, collection tubes	€416
163-3001	ProteoMiner Introductory Kit, 2 preps, includes 2 spin columns, wash buffer, elution reagents, collection tubes	€120
163-3002	ProteoMiner Sequential Elution Kit, 10 preps, includes 10 spin columns, wash buffer, 4 sequential elution reagents, collection tubes	€560
163-3003	ProteoMiner Sequential Elution Reagents, 10 preps, includes reagents only (columns not included), to be used with catalogue #163-3000	€122
